

Image Systems Medical Display Bundles

As a longtime provider of display solutions for the healthcare market, Richardson has the expertise to deliver medical imaging and advanced display systems your staff needs. We specialize in creating comprehensive solutions for diagnostic and clinical review, 3-D and post processing, surgical suites and modality-specific applications. Plus, all of our solutions meet the most critical agency certifications and calibration standards for patient monitoring, bio-medical displays, ultrasound, cardiac imaging and PACS.

Our healthcare services include:

- On-site facility audits to determine your unique needs
- Custom engineering and system integration
- Hardware installation
- Management and maintenance of your system throughout its lifecycle
- Component hot-swapping
- On-site user training and calibration

Richardson also understands that the health of your patients depends on flawlessly performing systems. That's why we offer you expert support through TekLink, our professional services group.

Display and Accessories Partners

Richardson is committed to understanding your visual technology needs and delivering a healthcare display solution that exceeds your expectations. In order to deliver the right solution, Richardson offers other best in class brands such as HP and NVIDIA®. In addition, our technical services teams are imaging experts allowing us to troubleshoot, offer advance replacement and support any brand of display solution that you purchase from Richardson. This customer-focused approach is just one of the many reasons companies choose to work with us.

**5 year
Standard Warranty
Hot Swap**

IMAGE SYSTEMS MEDICAL DISPLAYS

At the core of Richardson's Healthcare Display Solutions is our private label brand of Image Systems diagnostic and clinical imaging LCDs. Image Systems has been recognized as an industry-leading display brand for the last 20 years by consistently providing the highest quality diagnostic and clinical display solutions to the healthcare industry. A critical component of every Image Systems display bundle is our proprietary Calibration Feedback Software (CFS™). Our CFS™ calibration software is specifically designed to simplify the conformance and calibration of all Image Systems diagnostic and clinical use displays ensuring they maintain DICOM® compliance and are properly calibrated throughout their life-cycle.

PC - HP Z SERIES WORKSTATIONS

Combining ultimate performance with a revolutionary new industrial design, the HP Z Series delivers the extreme speed and massive expandability that you demand to tackle your biggest challenges. Designed for speed, inside and out, this series revolutionizes work-station industrial design. Featuring brushed aluminum side panels, integrated handles, visually cable-less engineering that maximizes airflow, modular component removal and reconnect, and optional liquid cooling.

- 3/3/3 parts/labor/NBD on site service and 24x7 TekLink Support.
- Includes all integration prior to delivery.

GRAPHICS CARD – NVIDIA® QUADRO® K2000D AND NVS® 315

NVIDIA® Quadro® K2000D – Outstanding NVIDIA Kepler™ Architecture Performance Optimized for Medical Imaging Solutions and DVI Display Users. The NVIDIA® Quadro® K2000D graphics board offers the perfect blend of performance and the latest productivity enhancing technical innovations at a very reasonable cost for a wide range of leading professional applications. With two DVI-DL connectors, and the ability to drive an additional side display, the K2000D is an ideal choice for color or grayscale medical imaging applications requiring 10- or 12-bit grayscale imaging with DICOM® monitor calibration support.

NVIDIA® NVS® 315 — The New Standard for Dual-Display Commercial Graphics. The NVS® 315 delivers incredible flexibility, scalability, and compatibility that lets you get the most from your existing display infrastructure. This version of the NVS® 315 can drive all of your existing DVI or VGA displays.
