

Good, Better, Best in Radiology Workstations

Sit-Stand workstations are rapidly gaining in popularity. Not only do they benefit the health and well-being of the user, they benefit the user's employer with increased productivity. Studies show that workstations offering varying positions are best suited to help prevent the prolonged sedentary behavior which is associated with computer usage. It has been said that sitting is the new smoking and that sit-stand workstations are a quick and easy fix to that unhealthy behavior.

Double Black Imaging, in our dedication to offer innovative health solutions, has assembled some sit-stand workstations that Diagnostic Imaging departments will find innovative, responsive, flexible, durable, and a most welcome addition to the department.
