Tilting Phoenix

1 Phoenix Electronic Monitor Mounts

Each user needs to be able to easily adjust the monitor so that the top of the screen is at or slightly below eye level.

When in standard viewing mode, the monitor should be at an arms length distance. In reading rooms the monitors need to have the ability to move the monitors forward and backward.

The newest monitor mount on [The Tilting Phoenix](#) allows users to easily adjust the monitors for standard viewing or closer viewing for each read.

2 Power

The Tilting Phoenix features a 12-outlet power bar in the cable management box, wireless charging, and 2 USB and A/C outlets on the surface of the desk with a sliding cover to protect from spills.

3 Lighting

The back light on the Tilting Phoenix helps reduce eye strain in dark rooms by off-setting the light from the monitors.

Task lighting is also incorporated onto the desk to offer ambient lighting without needing to turn on overhead lights.

Tilting Phoenix

4 Sound Proofing Privacy Panel

There are many distractions in the work place, the Privacy Panel helps reduce distractions and absorbs noise to help keep you on task.

5 Cable Management

Keep wires tidy with cable management box and cable ladder. Both allow IT teams quick access for any changes that need to happen immediately or down the road. 12-Outlet Power bar included in cable box for additional power for equipment on table.
