

Bundled Medical Display Solutions

Displays, CPUs, and Ergonomic Workstations — Configured Before Shipment

Double Black Imaging provides complete bundled workstation solutions designed to simplify deployment, reduce setup time, and support consistent performance across reading environments. From diagnostic displays and workstation-class CPUs to ergonomic radiology desks and accessories, DBI can deliver a complete solution that arrives configured, organized, and ready for installation.

Systems can be configured, tested, and organized before shipment to match each customer's requirements. Components are clearly labeled to help IT, PACS, biomed, and facilities teams deploy workstations faster and with fewer installation issues.

Whether supporting a single remote reader, a department refresh, or a multi-site rollout, DBI helps reduce the complexity of sourcing, staging, and installing medical display workstations by providing one coordinated solution from a single trusted partner.

Display Bundles Include:

- Diagnostic, breast imaging, clinical, pathology, or NDT displays
- Workstation-class CPUs and graphics solutions
- CFS™ Calibration Software configuration
- Phoenix ergonomic sit-stand workstations
- Monitor arms, mounting solutions, cable management, and accessories
- Pre-shipment configuration and testing
- Component labeling for simplified deployment
- Coordinated shipping and support from DBI
